SATYA RANJAN NAYAK

India | SQL - Python - Power BI - Excel - PowerPoint | github.com/satya20000

PROFESSIONAL SUMMARY

Electrical Engineering graduate with a strong interest in data analytics and business problem solving. Hands-on projects in e-commerce, credit risk, and SaaS have developed my ability to explore patterns, measure performance, and build interactive dashboards using SQL, Python, Excel, and Power BI. I bring a structured approach to turning complex datasets into clear insights that support better business decisions.

TECHNICAL SKILLS

Tools: SQL, Python, PostgreSQL, Power BI, DAX, Power Query, Microsoft Excel, Microsoft PowerPoint, Git/GitHub

Libraries & methods: Pandas, NumPy, Matplotlib, PivotTables, EDA, descriptive statistics, data cleaning, data modeling, KPI design, customer segmentation, funnel analysis, cohort analysis, churn and retention analysis

PROJECTS

Olist B2B Revenue Funnel

SQL | Python | Power BI | Excel | GitHub: ecomrevenuefunnel

- Analyzed 8,000 marketing-qualified leads and 842 closed wins (10.53% conversion); tracked 376 activated sellers and 295 repeat sellers across four funnel stages.
- Connected acquisition channels and lead cohorts to R$664,858 in observed post-close item GMV to compare seller activation and marketplace value.

Olist Customer Experience Analytics

SQL | Python | Power BI | GitHub: customexp

- Modeled 99,441 orders to investigate delivery reliability, geography, and reviews; measured 93.23% on-time delivery among eligible orders and a mean review score of 4.07/5.
- Built diagnostic views of timeliness, satisfaction, and regional fulfillment; measured mean delivery time of 12.56 days among timestamp-eligible orders.

LendingClub Credit Portfolio Analysis

SQL | Python | Excel | Power BI | GitHub: lenden

- Analyzed 39,717 historical accepted loans totaling $434.8M in funded principal; measured a 14.59% charged-off rate among 38,577 resolved loans.
- Compared credit grades, purposes, terms, and debt-to-income bands; calculated a 9.92% funding-weighted cumulative net cash return for resolved loans.

SaaS Revenue Retention & Churn Intelligence

SQL | Python | Power BI | DAX | GitHub: churnanalysis

- Modeled 5,000 subscription accounts across 36 months of synthetic educational data, with 4,035 active accounts at December 2025 month end.
- Tracked ending MRR of CU 1.39M, ARR of CU 16.65M, and December gross revenue retention of 99.03%; built cohort retention, cancellation, and billing-risk analyses.

EDUCATION

B.Tech, Electrical Engineering	Odisha University of Technology and Research	2021-2025	
Class XII	DAV Public School	2020	90%
Class X	Saraswati Vidya Mandir	2018	90%

CERTIFICATIONS

HackerRank: SQL (Basic & Intermediate), Python | **Great Learning:** Power BI, Microsoft Excel
